I love to see the night sky. When there are no clouds in the sky, it is full of stars and looks very beautiful. Stars are very big, but they are far off, so they look small. Besides stars, there are planets also. The Earth is a planet. The moon is the satellite of the earth and the sun is a star. When the night is dark, we can see the stars clearly. The stars are present in the sky during the day also. But we cannot see them because of the sun's powerful light. Sun, moon, planets and stars make up the universe. There are number of amazing things in this universe. We live on the Earth. There are rivers, seas, oceans, lakes and mountains on the earth. We should thank God for giving us this beautiful place to live in.
