TEACHER'S TIP

Since class 1 students have not been taught regrouping, such sums may only be done using the number strip.

Read the stories given below. Decide whether to add or subtract. Put the sign in the box and solve.

Maths Lab Activity

Addition of 2-digit Numbers

Objective: To build an understanding of addition of 2 digit numbers.

Materials Required: Ice cream sticks, *rajma* seeds and glue.

Preparation: 10 *rajma* seeds may be stuck on each ice cream stick. Some seeds are kept loose. Students work in pairs.

Steps: To find $23 + 46$.

1. One student keeps two sticks of ten and 3 loose *rajma* seeds to make 23.
2. The partner adds another 4 strips of ten and 6 loose *rajma* seeds.
3. They count how many loose *rajma* seeds are there in all—9 ones
4. Then they count how many sticks of ten are there in all—6 tens
5. They record the answer—69

Record the Activity:

6 tens 9 ones = 69

Answer: $23 + 46 = 69$

Try this out:

$$15 + 32 = 47$$

$$47 + 31 = 78$$

TEACHER'S TIP

The same material can be used to reinforce the concept of subtraction also.

Mental Maths

Learn

$$30 + 50 = 80$$

$$20 + 30 = 50$$

$$60 - 10 = 50$$

$$70 - 30 = 40$$

Do you see
a pattern?

Practice

- (a) $50 + 40 = \underline{90}$ (b) $30 + 30 = \underline{60}$ (c) $20 + 40 = \underline{60}$ (d) $30 + 60 = \underline{90}$
(e) $70 - 30 = \underline{40}$ (f) $60 - 20 = \underline{40}$ (g) $50 - 30 = \underline{20}$ (h) $40 - 10 = \underline{30}$

Use

- (a) $81 + 9 = 90$, so $9 + 81 = \underline{90}$
(c) $7 \text{ tens} + 7 = \underline{77}$
(e) $80 - 40 = \underline{40}$
(g) $23, 33, 43, \underline{53}$
(i) Number before 70 is $\underline{69}$.
(k) $75 \boxed{-} 1 = 74$
(m) $97 = \underline{9} \text{ tens } \underline{7} \text{ ones}$
(o) $56 - 56 = \underline{0}$
(q) $96 \boxed{+} 1 = 97$
(s) $63 - 3 = \underline{60}$
(b) $83 - 1 = \underline{82}$
(d) $86 - 0 = \underline{86}$
(f) $68 - \underline{68} = 0$
(h) $8 \text{ tens } 5 \text{ ones} = \underline{85}$
(j) One less than 58 is $\underline{57}$.
(l) $65 \boxed{-} 65 = 0$
(n) Number after 59 is $\underline{60}$.
(p) $30 + 40 = \underline{70}$
(r) One more than 99 is $\underline{100}$.
(t) $90, 80, 70, \underline{60}$

Test Your Skills.....

(For Chapters 4, 5, 6)

How Long?

Jessy and Paul were comparing the lengths of their pencils.

Whose pencil is longer? Jessy

Then they compared their pencil boxes by measuring them with paper clips.

How Tall?

Find the height of these objects by counting the erasers.

The candle is as tall as 6 erasers.

The pencil is as tall as 11 erasers.

The juice carton is as tall as 9 erasers.

The glove puppet is as tall as 14 erasers.

TEACHER'S TIP

Students may first be introduced to this concept merely by holding objects on the palm of their hand to decide which is heavier/lighter.

Finding the Weight

This book weighs as much as two pencil boxes.

Fill in the blanks.

3 mangoes weigh as much as
7 oranges.

4 books weigh as much as
1 water bottle.

2 snack boxes weigh as
much as 5 dusters.

8 pencils weigh as much as
1 sandwich.

TEACHER'S TIP

A hanger can be converted to an improvised balance scale by stringing small plastic containers on it with the help of twine.

How Heavy Is Each Object?

The banana weighs about
three clay balls.

A bottle of juice weighs about
7 clay balls.

The book weighs about
5 clay balls.

A box of cornflakes weighs
about 5 clay balls.

The book and cornflakes box
both weigh the same.

The bigger object
does not have to be
the heavier object.

TEACHER'S TIP

Have a collection of packets or boxes of different sizes, shapes and weight. Put things in them ensuring that there is no connection between size and weight (some smaller packets should be heavier than some larger ones). Students may be given any three packets at a time and asked to arrange them from heaviest to lightest and vice versa.

Worksheet

Use the pictures to fill in the blanks.

1. The mango weighs about 8 clay balls.
2. The apple weighs about 6 clay balls.
3. The orange weighs about 3 clay balls.
4. The Mango is the heaviest.
5. The Orange is the lightest.
6. The mango is heavier/lighter than the apple. (Cross out the wrong word)
7. The orange is heavier/lighter than the apple. (Cross out the wrong word)
8. Draw the correct number of marbles to balance the scale using the first set of pictures.
